

Technical drawing of a reinforced concrete column cross-section and elevation. The column is 50 cm wide and 50 cm high. It has a central vertical reinforcement bar labeled 'C' and four corner bars labeled '4'. The column is embedded in a foundation. The elevation shows a base level of -5.00 and a top level of -4.50. The foundation is 50 cm wide. The reinforcement details include 8#12 bars at 20 cm spacing for the column and 4#12 bars for the foundation.
